PURE GOLD DEFI

INTRODUCTION

The first ever Defi protocol cryptocurrency backed by Gold.

Pure Gold Defi is releasing only 1 million PGD tokens to public. These 1 million PGD Tokens will represent the public float (freely Trade able tokens) and once these 1 million PGD tokens are purchased, no other tokens will be released by company in any type of ICO.

Pure Gold Defi protocol TRC20 Token built on the tron blockchain, and is positioned to become the first cryptocurrency to be successfully used as a monetary instrument for individuals to transfer money worldwide.

Not only will Pure Gold Defi change the way people transfer money worldwide but it will also become the first crypto currency to be accepted by many leading retail stores.

Pure Gold Defi is a Future Gold. Save Your Gold In PGD and use For Business Transactions.

Pure Gold Defi is a currency that was built to be fast, secure, stable and anonymous with its low transaction fee.

It is an high speed distributed network based on tron blockchain.

Pure Gold Defi is a digital asset, PGD in abbreviation, based on TRC20, the technical standard used for tokens with in smart contract on the tron blockchain.

WHY TRON?

TRON is an ambitious project dedicated to the establishment of a truly decentralized Internet and its infrastructure.

The TRON Protocol, one of the largest blockchain-based operating systems in the world, offers base public blockchain support of high throughput, high scalability, and high availability for all decentralized applications in the TRON ecosystem.

TRC-10 Vs TRC-20

TRC-20

This token is used in smart contracts and contains more functionality than the TRC-10.

The tokens are fully compatible with the ETH ERC-20. So for the developer who wishes to use the multiple tokens for their dapps can benefit from this as well TRON (TRX) has a lot of potential on both crypto blockchain as well as in context of the smart contracts. Though the type of dapps that use it will decide its future.

TRC-10

In past, TRC-10 tokens were on the ETH blockchain but later moved to TRX own blockchain.

It is very easy to create and almost every popular desktop wallet these days has support for TRC-10 out of the box. It is also used in the popular Bittorrent protocol.

OUR AIM

Our team is up to build a secure, useful, & easy to - use product based on private blockchain.

It will include easy cryptocurrency payments integration, and even a digital arbitration system.

At the end, our aims to integrate all companies, employees, and business assets into a unified blockchain ecosystem, which will make business truly efficient, transparent, and reliable.

Each blockchain platform has its own native token. Such tokens serve as units of payment for the transaction fee incurred on the respective blockchain.

Besides, they may also be designated as rewards for network participants who contribute to upholding the integrity, security and availability of the blockchains.
